

FELIX GELLER

fgeller@pm.me
felix.geller.io

I wanted to become a software engineer since my youth and enjoy developing software till this day. Constantly learning while creating things is a luxury not every job has to offer. In my spare time I tend to spend as much [time outside](#) as I can and try myself at projects that involve other crafts like woodworking or gardening. Over the years I've scratched some of my own itches by writing open-source [software](#). In 2018 I quit my professional job to become a full-time dad for my two sons, but now I'm looking for new adventures in the area of software engineering. We have moved our family to the beautiful Austrian Alps which leads me to look for remote-only jobs.

SOFTWARE ENGINEER / TEAM LEAD

@ [MOVIO](#) AUCKLAND 2012 — 2018

- Led port of high throughput application to send email marketing campaigns from a monolithic to micro-service architecture. Go Scala akka PHP Javascript Kafka
